Thanks. I cross-checked with the "May Projections" workbook and added a column to your spreadsheet indicating which of these are on that list.

I have cc'd [REDACTED] I will discuss with them at 1pm today.

[REDACTED] and I met to compile the list of cases with determination documents and RS currently in QC—please see the attached list (thanks, [REDACTED] I suggest we ask RAD to let us know for each of these cases whether they have provided fate, eco, and health language in the latest format. I think we also need this info from RAD on cases in the May/hair on fire, etc. lists, so we may just want to add columns to a spreadsheet for them to check off when the language is ready?

Subject: List of cases in CCD QC

I've attached the list of cases, split into 3 sections – 19-2b, other boSNUR batch(es), and non-boSNUR waiting for QC cases.
